The design of middleware services to support pervasive computing is extremely challenging, posing new requirements for ease of deployment, handling of heterogeneity and scale, resilience to failure, application support and creation, and incremental deployment and evolution. Facing these challenges is a community wide effort, necessitating the pooling of our resources and experiences in order to develop new paradigms and techniques. The goal of this workshop is to foster the research community working in this field. Since its first installment in 2004, PerWare has successfully gathered the principal practitioners and their experiences under one roof to discuss their findings and move the state of the art forward. We look forward to continue this tradition in PerWare 2008.

**Topics** The workshop solicits papers addressing the following topics:

- Middleware design patterns for pervasive computing.
- Middleware platforms for mobile devices.
- Middleware support for user-centric computing.
- Middleware support for novel pervasive computing application models.
- Adaptable, recoverable, secure and fault tolerant middleware for pervasive computing.
- Metrics for evaluating pervasive computing middleware infrastructures.

**Submission Guidelines:** Paper submissions must cover one of the topics above, and should not exceed five pages. Furthermore, we will prioritize experience papers describing lessons learnt from built systems, including information about approaches that did and did not work, unexpected results, common abstractions, implementation of real-world scenarios, and metrics for evaluating pervasive computing middleware infrastructures.

Submissions of papers are solicited in the IEEE proceedings format. Research papers must be original prior unpublished work and not under review elsewhere. All submissions will be peer-reviewed and selected based on their originality, merit, and relevance to the workshop. Submissions in PDF format must be submitted online through the workshop page at [http://perware.cs.uiuc.edu/](http://perware.cs.uiuc.edu/) no later than October 12, 2007 (extended). Accepted papers must be presented at the workshop, and will appear in the IEEE PerCom workshop proceedings.

Please visit [http://perware.cs.uiuc.edu](http://perware.cs.uiuc.edu) or email perware@gmail.com if you have any questions.

**Important Dates**

- **Paper Submission:** October 12, 2007 (extended)
- **Acceptance Notification:** November 23, 2007
- **Camera-Ready:** December 21, 2007
- **Workshop Date:** March 17 or 21, 2008

**Organizing Committee**

- Jalal Al-Muhtadi, King Saud Univ., Saudi Arabia
- Anand Ranganathan, IBM TJ Watson, USA
- Gregor Schiele, University of Mannheim, Germany

**Program Committee**

- Cristina Abad, ESPOL, Ecuador
- Raquel Hill, Indiana University, USA
- Rodger Lea, University of British Columbia, Canada
- Soraya Kouadri Mostefaoui, Open University, UK
- Kenichi Yamazaki, NTT DoCoMo, Japan
- Roy Campbell, University of Illinois, USA
- Gerd Kortuem, University of Lancaster, UK
- Alan Messer, Samsung
- Umar Saif, LUMS, Pakistan
- Kenichi Yamazaki, NTT DoCoMo, Japan
